

Round number	Number in plate	Number removed	Number left	Number added	New amount (record this number in the second column of the next row)
1					
2					
3					
4					
5					
6					

If you successfully survive six rounds, look back at your chart and decide the rate at which your resource was replenished. How much was added to your plate in each round? What other patterns do you notice? Discuss this with your group and be ready to explain your conclusions to the class.
